SECOND REVIEW CONFERENCE OF THE
STATES PARTIES TO THE CONVENTION
ON THE PROHIBITION OF THE USE,
STOCKPILING, PRODUCTION AND
TRANSFER OF ANTI-PERSONNEL MINES
AND ON THEIR DESTRUCTION

Cartagena de Indias, 30 November-4 December 2009
Item 9 of the provisional agenda
Review of the operation and status of the Convention

REVIEW OF THE OPERATION AND STATUS OF THE CONVENTION
ON THE PROHIBITION OF THE USE, STOCKPILING, PRODUCTION
AND TRANSFER OF ANTI-PERSONNEL MINES AND ON THEIR
DESTRUCTION: 2005-2009

PART II

Submitted by the President-Designate of the Second Review Conference*
Annex I

States that have ratified or acceded to the Convention

</thead>
<tbody>
<tr>
<td>Azerbaijan⁵</td>
<td>In favour</td>
<td>Azerbaijan fully supports the comprehensive ban and destruction of anti-personnel landmines and envisaged the full ban and destruction of those mines throughout the world as an impetus to global security and welfare.</td>
<td>Azerbaijan has not acceded to the Convention since it was forced to use mines as a measure of containment from possible hostilities. Azerbaijan could not accede to the Convention without settlement of an armed conflict with a neighbouring State and the restoration of its territorial integrity and removal of the threat of resumption of hostility, even though it had stopped planting additional mines. Adherence to the Convention would only be possible after the final settlement of the conflict with the neighbouring State in question.</td>
<td>yes⁵</td>
<td></td>
</tr>
<tr>
<td>Bahrain³</td>
<td>In favour</td>
<td>Bahrain shares the Convention’s good cause and is aware that landmines will not solve any problems but rather create others.</td>
<td></td>
<td>yes</td>
<td></td>
</tr>
<tr>
<td>China³</td>
<td>In favour</td>
<td>China appreciates the humanitarianism enshrined in the Convention and endorses its purposes and objectives.</td>
<td></td>
<td>yes</td>
<td></td>

<tbody>
<tr>
<td>Cuba&lt;sup&gt;6&lt;/sup&gt;</td>
<td>Abstained</td>
<td></td>
<td>Cuba is under aggression from the only super-power in the world and, as such, is unable to accede in order to protect its sovereignty. It would continue to support all efforts by maintaining a necessary balance and working to minimise the effects of anti-personnel mines on civilian populations, particularly their indiscriminate and irresponsible use.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Egypt&lt;sup&gt;7&lt;/sup&gt;</td>
<td>Abstained</td>
<td>Egypt had imposed a moratorium on landmines long before the conclusion of the Convention.</td>
<td>Egypt state that the Convention is unbalanced as it does not acknowledge the responsibilities of States that had laid mines on other territories, as was the case in Egypt, where mines had been planted by Second World War powers.</td>
<td>yes&lt;sup&gt;5&lt;/sup&gt;</td>
<td></td>
</tr>
<tr>
<td>Finland&lt;sup&gt;8&lt;/sup&gt;</td>
<td>In favour</td>
<td>Finland will accede to the Convention in 2012 and will destroy its landmines by the end of 2016.</td>
<td>Finland’s credible defence capability will be maintained by acquiring systems to replace landmines in the period 2009-2016. In order to replace anti-personnel mines’ effect, extra funding of € 200 million will be included in the spending limits of the defence establishment 2009-2016 for the procurement of systems to replace the anti-personnel mines.</td>
<td>yes</td>
<td></td>

</tr>
</thead>
<tbody>
<tr>
<td>Georgia</td>
<td>In favour</td>
<td>Georgia has never produced anti-personnel mines and doesn’t retain the option to produce them. In 1996, the President of Georgia declared a moratorium on producing, importing and using anti-personnel mines.</td>
<td>Due to existing circumstances, it is not reasonable to join the Convention. The main reasons for not acceding to the Convention are the occupied territories and unstable environment surrounding them. This situation will prevent Georgia from the fulfilment of Convention obligations.</td>
<td>yes</td>
<td></td>
</tr>
<tr>
<td>India</td>
<td>Abstained</td>
<td>India supports the vision of a world free of the threat of anti-personnel landmines. Since 1997, India has discontinued the production of non-detectable anti-personnel mines and has observed a moratorium on their transfer.</td>
<td>India supports the approach, enshrined in CCW Amended Protocol II, to which it is a state party which addresses the legitimate defence requirements of States, especially those with long borders. The availability of militarily effective alternative technologies that can perform, cost-effectively, the legitimate defensive role of anti personnel landmines will considerably facilitate the goal of the complete elimination of anti-personnel mines.</td>
<td>yes</td>
<td>yes12</td>
</tr>
<tr>
<td>Iran</td>
<td>Abstained</td>
<td>Iran fully shares and sympathises with the concern of the international community over the tragic consequences of anti-personnel mines.</td>
<td>Particular security concerns of states should be effectively addressed. Searching for an alternative defensive means to replace anti-personnel mines is of major importance.</td>
<td>yes</td>
<td></td>
</tr>

</thead>
<tbody>
<tr>
<td>Israel[14]</td>
<td>Abstained</td>
<td>Israel joins all those countries in supporting international efforts to resolve the problem of indiscriminate and irresponsible use of anti-personnel mines.</td>
<td>Due to our unique situation in the Middle East involving an ongoing threat of hostilities as well as terrorist threats and actions along the borders, we are still obliged to maintain anti-personnel mines as necessary for self-defence in general and along borders in particular. Israel is unable to sign the Convention until effective alternative measures are available to ensure the protection of civilians threatened on a daily basis by terrorists and to ensure the protection of Israeli forces operating in areas of armed conflict.</td>
<td>yes</td>
<td></td>
</tr>
<tr>
<td>Kazakhstan[15]</td>
<td>In favour</td>
<td>Kazakhstan completely supports the humane orientation of the Convention.</td>
<td>Full destruction or even a moratorium on use of anti-personnel mines is unacceptable in the absence of an alternative system.</td>
<td>yes</td>
<td></td>
</tr>
<tr>
<td>Korea, DPR of[16]</td>
<td>Abstained</td>
<td>The DPR of Korea is not ready to accede given its complex security situation.</td>
<td>The DPR of Korea is not ready to accede given its complex security situation.</td>
<td>yes</td>
<td></td>
</tr>
<tr>
<td>Korea, Republic of[17]</td>
<td>Abstained</td>
<td>The Republic of Korea is concerned about and committed to mitigating human suffering, and is enforcing a moratorium on mine exports. It is also part of initiatives and trust funds on mine clearance and related humanitarian activities.</td>

<tr>
<td>Libyan Arab Jamahiriyyah&lt;sup&gt;21&lt;/sup&gt;</td>
<td>Abstained</td>
<td></td>
<td>The Convention does not take into account the problem in an objective fashion. It had also not taken into account the concerns of a large number of UN Member States. The Convention had prohibited the use of mines by the most impoverished countries, which only used them to defend their borders. The treaty also did not take into account that the smaller, weaker countries were subjected to occupation and aggression.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Marshall Islands&lt;sup&gt;22&lt;/sup&gt;</td>
<td>In favour</td>
<td>The Marshall Islands remains committed to the general principles of the Convention. We have witnessed firsthand the violence of mine-based warfare and we hope that the world's future generations will not be burdened with this dangerous practice. The Republic of the Marshall Islands does not, and has not, produced landmines. There are no known stockpiles. The Republic of the Marshall Islands has no current or future intention of such production or stockpiling.</td>
<td>Our limited technical capacity, as well as a variety of immediate and pressing demands…, severely constrain our ability to respond to all of our complex treaty commitments…Great care must be taken regarding future national action regarding the Convention. Such action may require a highly-complex analysis which successfully integrates our multiple international commitments.</td>
<td>no</td>

<tr>
<td>Poland(^33)</td>
<td>In favour</td>
<td>Poland has taken all the necessary steps to accede to the Convention in the near term. On 6 February 2009 the Government of Poland adopted Information on the state of readiness of the Council of Ministers to bind the Republic of Poland by the Convention, where it assured of its commitment to ratify the Convention in 2012. This adoption is the first step in the ratification process that will be initiated formally in due course. For several years Poland has voluntarily implemented most of the Convention’s provisions: we do not produce, export or use anti-personnel mines in military operations. Poland announced a moratorium on transfers of anti-personnel mines in 1995 which was prolonged indefinitely in 1998.</td>
<td>The reason for not acceding to the Convention so far was that Poland has not yet introduced to its armed forces viable solutions which would substitute anti-personnel mines.</td>
<td>yes</td>
<td>no</td>
</tr>
<tr>
<td>Russian Federation(^34)</td>
<td>Abstained</td>
<td>Russia is against the creation of forums where ones already exist. The Convention on Certain Conventional Weapons is the appropriate forum for the issue.</td>
<td>yes</td>

Annex IV

Suggested outline for preparing Article 5 extension requests

I. Executive Summary

- This could be 2-5 pages long, summarising the essential details required in accordance with Article 5, paragraph 4 and containing any other essential information which the requesting State Party would want to quickly and efficiently communicate.

II. Detailed Narrative

1. Origins of the Article 5 implementation challenge
2. Nature and extent of the original Article 5 challenge: quantitative aspects
3. Nature and extent of the original Article 5 challenge: qualitative aspects
4. Methods used to identify areas containing AP mines and reasons for suspecting the presence of AP mines in other areas
5. National demining structures
7. Nature and extent of progress made: qualitative aspects
8. Methods & standards used to release areas known or suspected to contain AP mines
9. Methods & standards of controlling and assuring quality
10. Efforts undertaken to ensure the effective exclusion of civilians from mined areas
11. Resources made available to support progress made to date
12. Circumstances that impede compliance in a 10 year period
13. Humanitarian, economic, social and environmental implications
15. Nature and extent of the remaining Article 5 challenge: qualitative aspects
16. Amount of time requested and a rationale for this amount of time
17. Detailed work plan for the period of the requested extension
   - If necessary, what survey activities will take place when to determine the actual location, size and other characteristics of mined areas?
   - How much will be released during each year of the extension period? (e.g., How much area? How many areas? Which areas? How will priorities be established?)
   - What demining, survey and other land release methods and what standards applied?
   - What is the annual cost and for what?
   - What are the expected sources of funding / other resources to implement the plan?
   - What assumptions are made regarding the realisation of the plan?
   - What are potential risk factors that may affect realisation of the plan?
18. Institutional, human resource and material capacity
   - What is available?
   - What institutions / structures will be established, and what changes to existing ones will be made, to realise the plan?
III: Annexes

- Map(s)
- List of abbreviations / acronyms
- Glossary
- Tables, possibly modified or replicated from the voluntary template adopted in November 2007, for example, listing all mined areas as well as their size, location, status and other characteristics.

Other considerations:

- Include a cover page containing the date of the document.
- Include contact information for an individual who can answer questions about the information contained in the extension request.
## Annex V

### Progress in the implementation of Article 5

</tr>
<tr>
<td>Bhutan</td>
<td>In 2007, Bhutan reported 50 MNM-14 anti-personnel mines and 12 M-16 anti-personnel mines that were laid on the track in an area called Gobarkunda and that 41 M-16 anti-personnel mines were laid on five tracks leading to the camps in Nganglam Sub-District.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Bosnia and Herzegovina</td>
<td>In 2004, Bosnia and Herzegovina reported approximately 2,000 square kilometres suspected to contain mines.</td>
<td>In 2004, Bosnia and Herzegovina reported 1,573 square kilometres suspected to contain mines.</td>
<td>In its extension request, Bosnia and Herzegovina indicated that it would complete implementation of Article 5 by 1 March 2009</td>
</tr>
<tr>
<td>Burundi</td>
<td>Burundi has indicated that its original challenge amounted to 234 suspected areas.</td>
<td>In 2009, Burundi reported that of the original 234 areas, 2 areas remain to be cleared and 58 additional areas have been identified.</td>
<td></td>
</tr>
<tr>
<td>Cambodia</td>
<td>A Level One Survey completed in 2002 identified 4,544 square kilometres of suspected hazardous area.</td>
<td>In its extension request, Cambodia projects that 648.8 square kilometres remain mine affected and will need to be addressed.</td>
<td>It its extension request, Cambodia has indicated that a 38 percent increase in financial resources will be necessary to complete implementation by 1 January 2020.</td>
</tr>

<tr>
<td>Thailand</td>
<td>In its extension request submitted in 2008, Thailand indicated that its original implementation challenge amounted to 934 suspected areas totalling 2,556.7 square kilometres.</td>
<td>In 2009, Thailand reported that the estimated amount of mined area remaining totalled 547.9 square kilometres.</td>
<td>In its extension request submitted in 2008, Thailand indicated that it would complete implementation of Article 5 by 1 November 2018.</td>
</tr>
<tr>
<td>Turkey</td>
<td>In 2005, Turkey reported 919,855 emplaced anti-personnel mines.</td>
<td>In 2008, Turkey reported that 817,397 emplaced anti-personnel mines remain.</td>
<td>In 2009, Turkey indicated that it would spare no effort to meet its 1 March 2014 deadline</td>
</tr>
<tr>
<td>Uganda</td>
<td>In its extension request submitted in 2009, Uganda indicated that its original challenge amounted to 427 suspected hazardous areas.</td>
<td>In its extension request submitted in 2009, Uganda indicated that one of the 427 originally identified areas remained as did one additional area for a total of 270,000 square metres.</td>
<td>In its extension request submitted in 2009, Uganda indicated that it would complete implementation of Article 5 by 1 August 2012.</td>
</tr>
<tr>
<td>United Kingdom of Great Britain and Northern Ireland</td>
<td>In its extension request submitted in 2008, the United Kingdom reported that its original challenge amounted to 117 mined areas (including 4 areas that are only suspected of containing mines) totalling over 13 square kilometres.</td>
<td>In 2009, the United Kingdom reported that the original 117 areas remained with efforts underway which would result in clearance starting in three areas.</td>
<td>In 2008, the United Kingdom was granted an extension until 1 March 2019.</td>
</tr>
<tr>

* Figures for Iraq only include the northern part of the country.

1 This table contains a list of those States Parties which, in 2009, were still in the process of implementing Article 5 of the Convention and the number of new civilian landmine casualties reported by each from 2004 to 2008. Numbers reported may include individuals killed or injured by explosive remnants of war other than anti-personnel mines.

1 In its reports submitted in 2003 and 2004, Afghanistan indicated that a decision on the number of mines to retain was pending. In its Article 7 report submitted in 2004, Afghanistan indicated that it currently retained 370 inert mines. In its Article 7 report submitted in 2005, Afghanistan indicated that the Government had yet to develop a formal policy on the number of mines retained for development and training purposes. The Government on a case-by-case basis approves the number and type of APMs retained by UNMACA on behalf of the MAPA.

2 In its report submitted in 2000, Argentina indicated that an additional number of mines to be retained by the Army was under consideration at that time. In its report submitted in 2002, Argentina indicated that 1160 mines were retained to be used as fuses for antitank mines FMK-5 and that 1000 will be consumed during training activities until 1 April 2010. Additionally, in Form F, Argentina indicated that 12025 mines would be emptied of their explosive content in order to have inert mines for training.
In its reports submitted in 2001 and 2002, Bosnia and Herzegovina indicated that 222 of the mines reported under Article 3 were fuse-less. In 2003, it indicated that 293 of the mines reported under Article 3 were fuse-less and in 2004, it indicated that 439 of the mines reported under Article 3 were fuse-less. In its report submitted in 2005, it indicated that 433 of the mines reported under Article 3 were fuse-less and also that the total of Article 3 mines was higher because it included the mines kept by demining companies, which hadn’t been previously reported. 

In its report submitted in 2001, Botswana indicated that a “small quantity” of mines would be retained. 

In its report submitted in 2001, Brazil indicated that all mines retained would be destroyed in training activities during a period of 10 years after the entry into force of the Convention for Brazil, that is by October 2009. In its report submitted in 2006, Brazil indicated that it intends to keep its Article 3 mines up to 2019.

In its report submitted in 2007, Brunei Darussalam indicated that there were no live anti-personnel mines prohibited by the Convention retained for the development and training in Brunei Darussalam. For these purposes, the Royal Brunei Armed Forces is using anti-personnel mines that are not prohibited by the Convention.

In its report submitted in 2009, Burundi indicated that the Directorate of Humanitarian Mine and UXO Action, with the assistance of MAG Burundi, recovered 41 anti-personnel mines on 29 April 2009. The mines are currently stored in a MAG Burundi facility.

3 In its reports submitted in 2001 and 2002, Bosnia and Herzegovina indicated that 222 of the mines reported under Article 3 were fuse-less. In 2003, it indicated that 293 of the mines reported under Article 3 were fuse-less and in 2004, it indicated that 439 of the mines reported under Article 3 were fuse-less. In its report submitted in 2005, it indicated that 433 of the mines reported under Article 3 were fuse-less and also that the total of Article 3 mines was higher because it included the mines kept by demining companies, which hadn’t been previously reported.

4 In its report submitted in 2001, Botswana indicated that a “small quantity” of mines would be retained.

5 In its report submitted in 2001, Brazil indicated that all mines retained would be destroyed in training activities during a period of 10 years after the entry into force of the Convention for Brazil, that is by October 2009. In its report submitted in 2006, Brazil indicated that it intends to keep its Article 3 mines up to 2019.

6 In its report submitted in 2007, Brunei Darussalam indicated that there were no live anti-personnel mines prohibited by the Convention retained for the development and training in Brunei Darussalam. For these purposes, the Royal Brunei Armed Forces is using anti-personnel mines that are not prohibited by the Convention.

8 In its report submitted in 2009, Burundi indicated that the Directorate of Humanitarian Mine and UXO Action, with the assistance of MAG Burundi, recovered 41 anti-personnel mines on 29 April 2009. The mines are currently stored in a MAG Burundi facility.

9. In a report submitted prior to ratifying the Convention in 2001, Cameroon reported the same 500 mines under Article 4 and Article 3. The 3154 mines reported in 2005 also appeared in both Forms B and D. In its report submitted in 2009, Cameroon indicated in Form B that 1,885 mines were held and in Form D that some thousands of mines were held for training purposes.

10. 84 of the 1941 mines reported in 2007 are without fuses.

11. In its report submitted in 2002, Chad reported that the quantity of mines retained for training purposes would be indicated in the next report.

12. In its reports submitted in 2003, 2004, 2008 and 2009, the Democratic Republic of the Congo indicated that the decision concerning mines retained was pending.

<sup>13</sup> In a statement received on 12 September 2007, Ecuador indicated that it destroyed 1,001 anti-personnel mines on 14 August 2007.

<sup>14</sup> In its report submitted in 2005, Eritrea indicated that the mines retained were inert. In its report submitted in 2007, Eritrea indicated that 9 of the 109 mines retained were inert. In its report submitted in 2008, Eritrea indicated that 8 of the 109 retained mines were inert.

<sup>15</sup> At the 9MSP, Ethiopia indicated that 1,114 anti-personnel mines were going to be retained under Article 3.

<sup>16</sup> In its reports submitted in 2004 and 2005, Guinea Bissau indicated that it would retain a very limited number of AP mines. In its reports submitted in 2006 and 2008, Guinea Bissau indicated that amongst the 109 retained mines, 50 POMZ2 and 50 PMD6 do not contain detonators or explosive. In its report submitted in 2009, Guinea Bissau indicated that the 50 POMZ2 were transferred for metal use and the 50 PMD6 were eliminated and used as wood.

17 In its report submitted in 2004, Lithuania indicated that fuses of MON-100 and OZM-72 mines had been changed to remotely-controlled and that they no longer fall under the Convention’s definition of APMs. These mines will not appear in next year’s exchange of information.
18 In its reports submitted in 2003 and 2004, Malawi indicated that mines declared under Article 3 were dummy mines.
19 In its reports submitted in 2004 and 2005, Malaysia indicated that, for the purpose of training, the Malaysian Armed Forces is using practice antipersonnel mines.
In its reports submitted in 2001 and 2002, the mines reported by Mauritania under Article 3 were also reported under Article 4.

In its reports submitted in 2002 and 2003, the mines reported by Mauritius under Article 3 were also reported under Article 4.

In its report submitted in 2009, Mozambique indicated that 520 of the retained mines were inherited from an NPA mine detection training camp. This camp is not used as training falls outside of the IND scope of work so the mines will be destroyed in June 2009.

In its report submitted in 2007, New Zealand indicated that it retains operational stocks of M18A1 Claymores which are operated in the command-detonated mode only. Other than the M18A1 Claymores, the New Zealand Defence Force holds a very limited quantity of inert practice mines, used solely in the training of personnel in mine clearance operations, in accordance with Article 3 of the Convention.

In its report submitted in 2003, the mines reported by Niger under Article 3 were also reported under Article 4.

²² In its report submitted in 2009, Mozambique indicated that 520 of the retained mines were inherited from an NPA mine detection training camp. This camp is not used as training falls outside of the IND scope of work so the mines will be destroyed in June 2009.
²³ In its report submitted in 2007, New Zealand indicated that it retains operational stocks of M18A1 Claymores which are operated in the command-detonated mode only. Other than the M18A1 Claymores, the New Zealand Defence Force holds a very limited quantity of inert practice mines, used solely in the training of personnel in mine clearance operations, in accordance with Article 3 of the Convention.
²⁴ In its report submitted in 2003, the mines reported by Niger under Article 3 were also reported under Article 4.

\(^{25}\) In its report submitted in 2004, Papua New Guinea indicated that it had a small stock of command-detonated Claymore mines for training purposes only by the Papua New Guinea Defence Force.

\(^{26}\) In its report submitted in 2000, Portugal indicated that only 3000 of the retained mines were active, the rest was inert.

\(^{27}\) In its report submitted in 2003, Rwanda indicated that the 101 mines declared under Article 3 had been uprooted from minefields to be retained for training purposes.

\(^{28}\) In its reports submitted in 2007 and 2008, Senegal indicated that the 24 mines it retains under Article 3 were found during demining operations or in rebel stocks held before they were destroyed in August-September 2006. These mines have been defused and are used to train deminers.

\(^{29}\) In its report submitted in 2009, Serbia indicated that all fuses for 510 PMA-1 type and 560 PMA-3 type had been removed and destroyed.

---

30 In its report submitted in 1999, South Africa indicated that 10992 of the 11247 mines declared under Article 3 were empty casings retained for training of members of the SNDF.
31 While Spain did not submit an Article 7 report in 2000, the report submitted in 2001 covered calendar year 2000.
32 In its report submitted in 2004, although Suriname reports 296 mines as retained under Article 3, it mentioned that from 1995 there were no mines retained for training in mine detection or clearance. In its report submitted in 2008, Suriname indicated that the last 146 mines retained under Article 3 were destroyed.
33 In its report submitted in 2001, Sweden indicated that 11120 mines declared under Article 3 were complete mines or mines without fuses. In its report submitted in 2002, it indicated that 2840 of the declared mines were without fuses and could be connected to fuses kept for dummies. In its report submitted in 2003, it indicated that 2782 mines were without fuses and could be connected to fuses kept for dummies. In its reports submitted in 2004 and 2005, it indicated that 2840 mines were without fuses and could be connected to fuses kept for dummies. In its report submitted in 2009, Sweden indicated that 2780 mines were without fuses and could be connected to fuses kept for dummies.
34 In its Article 7 report submitted in 1999, Thailand indicated that the 15604 retained mines included 6117 Claymore mines.
In its report submitted in 2004, Turkmenistan indicated that it started the process of destruction of 60000 antipersonnel mines in February 2004. In a statement to the Standing Committee on the General Status and Operation of the Convention on 25 June 2004, it indicated that the remaining 9200 mines would be destroyed during the year.

In its report submitted in 1999, the United Kingdom reported 2088 mines with a shelf life expiring on 1 August 2002, 1056 mines with a shelf life expiring on 1 August 2010, 434 inert training shapes and 859 mines of foreign manufacture. In its report submitted in 2000, it reported 2088 mines with a shelf life expiring on 1 August 2002, 1056 mines with a shelf life expiring on 1 August 2010, the inert shapes have been taken off the total since they don’t fall under the Convention’s definition of a mine and 1375 mines of foreign manufacture. In its report submitted in 2001, it reported 2088 mines with a shelf life expiring on 1 August 2002, 1056 mines with a shelf life expiring on 1 August 2010 and 1775 mines of foreign manufacture. In its report submitted in 2002, it reported 2088 mines with a shelf life expiring on 1 August 2002, 1056 mines with a shelf life expiring on 1 August 2010 and 1805 mines of foreign manufacture. In its report submitted in 2003, it reported 2088 mines with a shelf life expiring on 1 August 2002, (the UK is currently working towards their destruction), 1028 mines with a shelf life expiring on 1 August 2010 and 1783 mines of foreign manufacture.

In its report submitted in 2008, Zimbabwe reported 700 mines retained for training in Form D and indicated that 100 had been destroyed during training in 2007 in Form B.

<tr>
<td>4. Argentina</td>
<td>In 2005, Argentina reported that it estimated that mines will be used as follows in coming years: between 2005 and 2011, approximately 90 to 100 Type SB 33 and Type FMK-1 mines per year will be used to train Argentine army engineers; in 2005 and 2006, approximately 150 Type Expal P4B, 50 Type MFK1 and 50 Libyan anti-personnel mines will be used for the development and testing of the remote-controlled detection / destruction vehicle; in 2005 approximately 150 Type FMK1 and 150 Type Expal P4B mines will be used for the destruction of unexploded ordnance; and, between 2005 and 2010 approximately 40 Type Expal P4B, Type MFK1 and Libyan anti-personnel mines per year will be used be used in basic and advanced humanitarian demining courses, and, for EOD and demining training and for peace keeping forces. (2005)</td>
</tr>
<tr>
<td></td>
<td>In 2006, Argentina reported that mines are retained by the navy for anti-personnel mines destruction training activities, more specifically to train marines engineers in destruction techniques. The development of an annual training programme will lead to the destruction of the 610 remaining mines retained by the navy by 2012. (2006)</td>
</tr>
<tr>
<td></td>
<td>Argentina indicated that in 2007 the navy destroyed 81 mines SB-33 during training activities conducted by the Company of Amphibious Engineers on destruction techniques. The army retains mines to develop an unmanned vehicle for the detection and handling of mines and explosives. Development of this vehicle started on 1 March 2004 and is 60% complete. The vehicle is currently at the stage of assembling. During 2007 no mines were destroyed for this project. Mines are also retained by the Institute of Scientific and Technical Research of the Armed Forces to test</td>

| 16. Canada | In 2005, Canada informed the Standing Committee on the General Status and Operation of the Convention that since entry into force it had used 180 Type M-14 mines for research and training, noting the value of this mine for these purposes being its low metal content and that it is found in many mine-affected countries. In addition, Canada informed the Standing Committee that 8 Type PMR-2A mines were used to test and evaluate personal protective equipment given that the fragment velocity and size of this mine is quite different from other mines and because it too is found in many mine-affected countries. As well, Canada indicated that 102 Type PMA-2 mines were used to test and evaluate metal detectors and instrumented prodders as this mine represents a difficult target for detection and to test and evaluate protective equipment. (2005)  
In 2005-2006, Canada also reported 157 anti-personnel mines transferred from Afghanistan to train Canadian soldiers with anti-personnel mines they are currently facing in Afghanistan. (2006)  
Canada reported that it retains live anti-personnel mines to study the effect of blast on equipment, to train soldiers on procedures to defuse live anti-personnel mines and to demonstrate the effect of landmines. For example, live mines help determine whether suits, boots and shields will adequately protect personnel who clear mines. The live mines |

<tr>
<td></td>
<td>are used by the Defence department’s research establishment located at Suffield, Alberta and by various military training establishments across Canada. The Department of National Defence represents the only source of anti-personnel mines which can be used by Canadian industry to test equipment. Since the last report Canada has not acquired or used anti-personnel mines mainly due to the closure of the Canadian Centre for Mine Action Technologies. A variety of anti-personnel mines are necessary for training soldiers in mine detection and clearance. Counter-mine procedures and equipment developed by Canada’s research establishment must also be tested on different types of mines member of the Canadian Forces or other organisations might encounter during demining operations. The Department of National Defence retains a maximum of 2,000. This number is to ensure Canada has a sufficient number of mines for training and for valid testing in the area of mine detection and clearance. Canada will continue to conduct trials, testing and evaluation as new technologies are developed. There will be a continuing requirement for provision of real mine targets and simulated minefields for research and development of detection technologies. (2008)</td>

<td>21. Croatia</td>
<td>In 2005, Croatia informed the Standing Committee on the General Status and Operation of the Convention that the main purpose in retaining mines was to test demining machines. In addition, it indicated that in 2004, the Centre for Testing, Development and Training was established with its primary task being to test demining machines, mine detection dogs and metal detectors, and, to undertake research and development of other demining techniques and technologies. Croatia estimated that 189 mines would be needed in 2005. (2005) Croatia reported that in 2005, during testing and evaluating of demining machines on the test polygon in Cerovec, CROMAC-CTDT Ltd. used and destroyed 164 mines. These mines were used to test the following machines: excavator “MT-01”, working tools – machine “MINE-WOLF”, working tools – machine “MFV 1200”, machine “MFV 2500/580”, machine “MVR-01”, machine “MV-10”, excavator “ORKA”. (2006) Croatia informed the Standing Committee on the General Status and Operation of the Convention that in 2006, 57 anti-personnel mines were used for testing of demining machines. The main purpose for which retained mines were used up to date is testing demining machines Bo.ena 5 and Mini .MINE-WOLF and RM-KA 02. Only after comprehensive testing the machines would receive appropriate certification which would enable them to operate in Croatia and beyond. (2007)</td>
</tr>
<tr>
<td>22. Cyprus</td>
<td>In 2006, Cyprus informed the Standing Committee on the General Status and Operation of the Convention that the retained mines were used by the National Guard for the training of conscripts. Training included tracing techniques, reconnaissance, clearance and destruction of anti-personnel mines. After the completion of training all anti-personnel mines were collected and stored in specially designed warehouses. Cyprus indicated that the mines might be used for</td>

<tr>
<td>Germany</td>
<td>Germany reported that it retained anti-personnel mines under Article 3 with the following objectives 1) detection and demining equipment research and testing, 2) vehicle mine protection programme, 3) mine detection dogs, and 4) accident research, for the following projects/activities: 1) Mobile Minesearch and Clearing system, 2) Modular Fragment Protection, 3) Regular dog training at the Dog Handling Centre where the anti-personnel mines are placed in permanent search fields with fusing mechanisms party or entirely removed. In 2006 at the Federal Armed Forces Technical Centre 91, 14 anti-personnel mines were used for the vehicle mine protection programme and accident research, 5 anti-personnel mines were destroyed, 20 anti-personnel mines type MRUD were delivered from the Balkans and 19 antipersonnel mines were transferred to Rheinmetall Unterlüß. (2007)</td>
</tr>
<tr>
<td></td>
<td>At the Standing Committee on the General Status and Operation of the Convention, Germany reported that pursuant to Article 3, it has set itself an upper ceiling of 3,000 anti-personnel mines to the maximum. These stocks of APMs clearly earmarked and stored for non-operational purposes, are regarded as necessary for the effective continuation and improvement of the protection of Germany’s deployed soldiers against anti-personnel mines. The available anti-personnel mines pool enables a cost-saving and efficient execution of technical examinations in the area of Force Protection. Due to the International Test and Evaluation Programme for Humanitarian Demining (ITEP), many efforts have been undertaken to test and evaluate mine action equipments, systems and technologies. Nevertheless, efforts have continued in order to develop field equipment and tools based on realistic and future needs for the Federal Armed Forces. (2008)</td>
</tr>
<tr>
<td></td>
<td>At the Standing Committee on the General Status and Operation of the Convention in 2009, Germany reported that all together since 1998, it has used up a total of 685 antipersonnel mines for testing. For training purposes, German Armed Forces are using dummies. In 2008, Germany decided to set up a special test field for testing multiple sensor mine detection and search systems. The implementation of the project will take place in 2009 at the Federal Armed Forces Technical Centre 52 (WTD 52) in Bavaria. Germany offers available test capabilities for testing procedures on handheld systems – beginning in 2010 – to NATO Member States as well as to Partners in the International Test and Evaluation Programme for Humanitarian Demining (ITEP). In 2007, at the Federal Armed Forces Technical</td>

<td>Centre 91, 14 anti-personnel mines were used for the vehicle mine protection programme, In 2008, German Armed Forces used 7 anti-personnel mines for testing purposes. 5 mines were used for vehicles mine protection programmes, 2 mines were used for analysis of IED attacks on German Armed Forces.</td>
</tr>
<tr>
<td>32. Greece</td>
<td>Guinea Bissau indicated that the 109 retained antipersonnel mine are retained by the armed forces of Guinea Bissau, 100 of which do not contain detonators or explosive. These mines are retained to train military deminers regarding how mines work and in recognition training. (2006)</td>
</tr>
<tr>
<td>33. Guinea-Bissau</td>
<td>In 2006, Honduras informed the Standing Committee on the General Status and Operation of the Convention that plans for use of retained mines included: training of engineering staff to support demining work in countries affected by mines, and training to deal with the reported presence of mines in Honduras.(2006)</td>
</tr>
<tr>
<td>34. Honduras</td>
<td>Indonesia reported that the anti-personnel mines retained under Article 3 will be used as instruction/teaching materials which will further enhance the students capability to identify, detect and destruct landmines in general, particularly in preparing Indonesia’s participation in peacekeeping operations.(2008)</td>
</tr>
<tr>
<td>35. Indonesia</td>
<td>Italy indicated that warfare mines are utilized for bomb disposals and pioneers training courses. Four such training courses are organised every year.(2008)</td>
</tr>
<tr>
<td>36. Iraq</td>
<td>In 2008, At the Standing Committee on the General Status and Operation of the Convention, Japan indicated that in accordance with the exceptions in Article 3, Japan has used anti-personnel mines for the purposes of training in mine detection, mine clearance, and mine destruction techniques, as well as for developing mine detection and mine clearance equipment. Within its annual Article 7 reports, Japan supplied information on the use of its retained mines and the results of such use. Specifically, Japan provided data on: (1) mine detection, mine clearance or mine destruction techniques developed and under development; (2) training in mine detection, mine clearance or mine destruction; and (3) the number of personnel trained. In 2008, Japan plans to use anti-personnel landmines retained under Article 3 for the purpose of training infantry and engineering units of the Self Defense Force in mine detection and mine clearance.</td>
</tr>
</tbody>
</table>
In accordance with Article 3 of the Convention, Japan retains anti-personnel mines for the purpose of training in and development of mine detection, mine clearance and mine destruction techniques (At the time of entry into force in 1999: 15,000 retained. As of December 2007: 3,712 retained). However, the number possessed is the minimum absolutely necessary for training the Self Defense Force units and technology development trails. Japan reported that it consumed 565 mines in 2007 for education and training in mine detection and mine clearance, and for the development of mine detectors and mine clearance equipment. (2008)

In 2007, Jordan reported at the Standing Committee on the General Status and Operation of the Convention that NPA-Jordan carried out mine detection training of 4 new mine detection dog teams in May 2007 and July 2007 using a total of 50 retained mines. Training took place in the south of Jordan for the Wadi Araba/Aqaba Mine Clearance Project as well as in the north of Jordan for the Northern Border Project. The MDD Teams are trained by first creating a sample mine field using a small number of retained mines of the same type the MDD teams will be expected to encounter. The mines are laced in the ground prior to the training. The training is then carried out by the MDD teams in order for the dogs to learn to recognize the scent of those particular mines. (2008)

In 2006, Kenya informed the Standing Committee on the General Status and Operation of the Convention that 540 anti-personnel mines had been used for the purposes described under Article 3. These mines were consumed during humanitarian demining and EODs training, demolition/destruction practical exercises and mine awareness training to peacekeeping contingents deployed to various missions. (2007)

Latvia indicated that there were no reasons for retaining mines other than training EOD experts for participation in international operations. In 2007, 3 mines were destroyed during mine destruction training. (2008)

In 2006, Mauritania informed the Standing Committee on the General Status and Operation of the Convention that of the 728 mines retained, 85 are held in training centres and 643 will be used for training activities as well once the

<td>Namibia indicated that the mines will be used during training of its troops and deminers so that they can identify and learn to detect, handle, neutralize and destroy the mines whenever they are found. Training is still under way during the period under review and the number of mines retained will decrease further as the training continues.</td>
</tr>
<tr>
<td>49. Netherlands</td>
<td>In 2006, the Netherlands informed the Standing Committee on the General Status and Operation of the Convention that the training programmes for which the retained mines are used consist of instructing all military personnel in mine awareness, how to act in a mined area and what to do to safely get out. This training forms part of the basis of every military instruction in the Netherlands, and are intensified prior to all troop deployments. Annually around 7,000 military receive the initial training on awareness. Moreover 450 military engineers are being trained annually to defuse or destruct anti-personnel mines, and to clear mined minefields and other mined areas. In addition, the Netherlands indicated that it retains mines for technical development. The research conducted is aimed at the development of new and improved detection and clearance technologies, as well as simulation mines. The Netherlands does not have yet such simulation mines at its disposal, but plans to replace part of the currently retained mines by simulations when possible. (2006)</td>
</tr>
<tr>
<td>50. Nicaragua</td>
<td>In 2006-2007, Nicaragua reported that a total of 36 mines were destroyed in training during 2006. 10 PPMISR11 mines were destroyed in November 2005-May 2006 during a humanitarian demining training course. In addition, 26 PMN mines were deactivated, their explosive parts being removed (charge and detonator), with the aim of using them for retraining and verification of detectors used in the front lines of operations. These mines can be considered destroyed or unusable, since the removed parts were destroyed and can no longer be restored in their technical capacity to function as anti-personnel mines. (2007)</td>

<tr>
<td>70. United Kingdom of Great Britain and Northern Ireland</td>
<td>The United Kingdom indicated that anti-personnel mines are retained with the objective of identifying APM threat to UK forces and maintaining and improving detection, protection, clearance and destruction techniques. In 2006 1,248 anti-personnel mines were destroyed because they were unsafe. (2007)</td>
</tr>
<tr>
<td>71. United Republic of Tanzania</td>
<td>In 2006, the United Republic of Tanzania informed the Standing Committee on the General Status and Operation of the Convention that 369 anti-personnel mines were retained to train troops and 777 are for the APOPO project. This project trains sniffer rats to detect explosives. It has about 250 mine detection rats (MDR) bred and trained by 77 staff and produced 18 MDR teams currently carrying out operations in Mozambique. The APOPO Project has used 44 of the 777 retained, so the United Republic of Tanzania currently retains 1,102 anti-personnel mines. Since the Great Lake Region countries have committed to utilise MDR in their humanitarian demining efforts, the Tanzanian Government plans to increase the number of trained MDR to respond to the demand from these countries. (2006)</td>
</tr>
<tr>
<td>In 2007, The United Republic of Tanzania reported that the Great Lake Region countries plan to utilize mine detection rats in their humanitarian demining efforts, so the Government of Tanzania requested 1,000 deactivated anti-personnel mines from the Government of Mozambique with the aim of training more MDR to respond to the demand of these countries. 1 Until the end of the 2000-2001 Intersessional Work Programme, this Standing Committee was called the “Standing Committee on Victim Assistance, Socio-Economic Reintegration and Mine Awareness”.

2 Until the end of the 1999-2000 Intersessional Work Programme, this Standing Committee was called “the Standing Committee of Experts on Mine Clearance” when it was merged with the “Standing Committee of Experts on Mine Action Technologies” to become the “Standing Committee on Mine Clearance and Related Technologies.” Following the end of the 2000-2001 Intersessional Work Programme, it became the “Standing Committee on Mine Clearance, Mine Awareness and Mine Action Technologies”, with the name again changing following the 2001-2002 Intersessional Work Programme to become the “Standing Committee on Mine Clearance, Mine Risk Education and Mine Action Technologies”.

3 At the Second Meeting of the States Parties, the decision was taken to merge “the Standing Committee of Experts on Mine Clearance” and the “Standing Committee of Experts on Mine Action Technologies” into the “Standing Committee on Mine Clearance and Related Technologies.”
