The ISU provides information on the Convention, its status and its operations at national and regional workshops intended to increase understanding of the Convention by States not parties. Such a workshop in the Nicosia in 2003 assisted Cyprus in taking the decision to ratify the Convention.

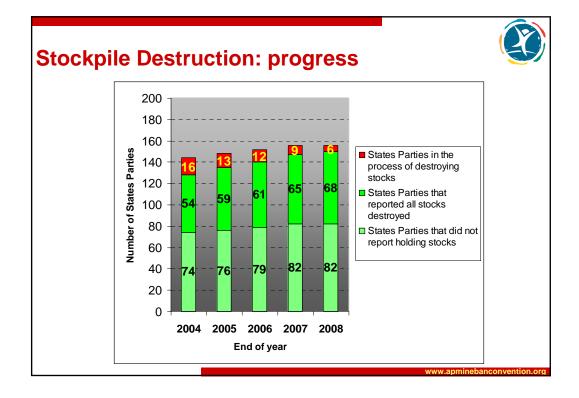

## **Stockpile Destruction**

- Each State Party "undertakes to <u>destroy or</u> <u>ensure the destruction of all stockpiled</u> <u>anti-personnel mines</u> it owns or possesses, or that are under its jurisdiction or control, as soon as possible but <u>not later than four</u> <u>years</u> after the entry into force of this Convention for that State Party."
- States Parties <u>may retain</u> "a number of antipersonnel mines <u>for the development of</u> and training in mine detection, mine clearance, or mine destruction techniques." This number "shall not exceed the minimum number absolutely necessary" for these purposes.

Stockpiled anti-personnel mines can be destroyed by open detonation, a method used by Lithuania in advance of the First Review Conference in 2004.

#### **Mine Clearance**

- "Mined area" means an area which is dangerous due to the presence or suspected presence of mines.
- Each State Party shall report all mined areas containing AP mines.
- Each State Party reporting mined areas must, as soon as possible or no later than 10 years after entry into force for that State Party, render these areas no longer dangerous due to the presence or suspected presence of AP mines.
- If a State Party believes it will be unable to do this, it may request an extension.
