

REPUBLIC OF ALBANIA

DECLARATION OF COMPLETION OF IMPLEMENTATION OF ARTICLE 5 OF THE CONVENTION ON THE PROHIBITION OF THE USE, STOCKPILING, PRODUCTION AND TRANSFER OF ANTI-PERSONNEL MINES AND ON THEIR DESTRUCTION

Albania

30 November 2009

1. Albania ratified the Convention on 29 February 2000. The Convention entered into force for Albania on 1 August 2000. In its initial transparency report submitted on 3 April 2002, Albania reported areas in northeast Albania that contained anti-personnel mines. In doing so, Albania acknowledged that it had an obligation under Article 5 of the Convention to destroy or ensure the destruction of all anti-personnel mines in mined areas under its jurisdiction or control as soon as possible and no later than 1 August 2010.
2. During the Kosovo crisis in 1998/1999 the Former Republic of Yugoslavia (FYR) military forces laid mines on both sides of the border of Albania and Kosovo and fired cluster munitions (KB1) inside the Albanian territory; additionally NATO cluster strikes left unexploded ordnance (UXO) scattered along the same area.
3. Immediately after the Kosovo crisis in 1999, the Government of Albania responded swiftly by conducting rapid surface clearance, which dramatically reduced civilian casualties. However, the work was not carried out in accordance with the International Mine Action Standards (IMAS) and the area had to be re-cleared. Shortly thereafter, a post-conflict General Mine Action Assessment (GMAA) was carried out from August to September 1999 by the Albanian Armed Forces utilizing signposts donated by UNICEF; the survey work was further confirmed by limited independent surveys carried out by the NGO "CARE". The survey identified initially 102 dangerous areas in a total of estimated 15.25 square kilometres of suspected mined contaminated area in 39 villages and affecting approximately 25,000 people along the 120 kilometres long border with Kosovo in the districts of Kukes, Tropoje, and Has. The threat identified in these areas included anti-personnel and anti-tank mines, unexploded ordnance (UXO) and cluster munitions.
4. In 1999, in order to respond to the threat of anti-personnel landmines and to adequately implement mine action, an inter-ministerial body – The Albanian Mine Action Committee (AMAC) - was established. This body acted as the overall policy making body for mine action. At the same time, an operational body – the Albanian Mine Action Executive (AMAE) - was established to carry out the mine action program under direction of the AMAC. In 1999, the Albanian Government established the national structures to mine action structures are established since 1999, consisting of the Albanian Mine Action Committee (AMAC) - an inter-ministerial policy-making body and the Albanian Mine Action Executive (AMAE) in charge of coordination and monitoring of the mine action activities, which include: mine/UXO clearance, mine risk education and mine victim assistance.

5. From 2000-2002 demining organizations conducting humanitarian demining in Albania included RONCO, HELP, the Swiss Foundation for Demining (FSD) and Dan Church Aid (DCA). It is estimated that approximately 2 million square meters of dangerous area was released by these organizations during 2000 – 2001 through manual clearance, impact and technical surveys.
6. The period of 2002 and 2003 were important years in terms of capacity building of the national program. In April 2002, upon request from the Government of Albania, a United Nations Development Programme (UNDP) capacity building program was initiated aimed at building sustainable local capacities for coordination and monitoring of mine action activities. Additionally, in June 2002 an important workshop was held to formulate a vision, mission, priorities and a mine action plan with the vision of Albania being mine and UXO free by 2010. During this time a sustainable structure capable of monitoring mine action in Albania was created with the establishment of an AMAE regional office in northeast Albania with the support of the International Trust Fund of Slovenia. The Regional Office included an integrated quality management section tasked with the quality control and quality assurance of mine action operations. Additionally, a complete set of National Mine Action Standards, based on IMAS, was introduced.
7. During 2002-2003, DCA and FSD were deployed for demining in Albania. With increased coordination and more efficient utilization of demining assets, about 9,000,000 square meters of contaminated land was released through impact /technical surveys and clearance operations during these years. The demining assets of DCA and FSD consisted of survey and manual demining teams, demining machines (Bozena 1 mini-flail and an ML-1 medium flail) and mine detection dogs.
8. In 2004 the Albanian mine action programme was negatively affected by two unfortunate events, 1) the unexpected withdrawal from Albania of one of the demining organizations (FSD) in early 2004 due to lack of funds and 2) a tragic accident during the training phase of a technical survey project which caused the suspension of the project for the whole season. As a result, the demining progress was limited and the clearance objectives set out in the national demining plan could not be fully achieved. For this reason a revision of the national mine action strategy was deemed necessary, which included a revision of the annual clearance and area release benchmarks.
9. From 2004 until fulfilment of Albania's mine clearance obligations, mine clearance operations have been conducted by DCA in accordance with the National Demining Plan and Priorities. Late in 2004, DCA expanded its capacities in also conducting battle area clearance. From 2007 onwards, DCA has operated with manual demining teams only and has had a fully nationalized programme with only one expatriate Programme Manager.
10. As a result of efforts undertaken since Albania submitted its initial transparency report, Albania declares that it has fulfilled its obligations under Article 5 of the Convention by having determined that there are no longer areas under the jurisdiction or control of Albania in which anti-personnel mines are known or suspected to be emplaced. Upon declaring completion, 16,608,055 million square meters of area in which anti-personnel mines and unexploded ordnance were known or were suspected to be emplaced has been released through survey and clearance. This work has culminated in the destruction of 12,452 anti-personnel mines, 152 anti-tank mines and 4,965 UXOs.
11. Throughout these years, donors to the clearance operations in Albania include: The European Union and the Governments of United States of America, Germany, United Kingdom,

Switzerland, Denmark, Canada and Czech Republic. Implementing partners for mine clearance include: the local authorities of Kukes Region, the International Trust Fund for Demining and Mine Victims Assistance (ITF) in Slovenia, the UNDP, DanChurchAid, the Swiss Foundation for Demining, RONCO, HELP and the Geneva International Centre for Humanitarian Demining (GICHD).

12. In the event that previously unknown mined areas are discovered after this date, Albania will:

- i. report such mined areas in accordance with its obligations under Article 7 and share such information through any other informal means such as the Intersessional Work Programme;
- ii. ensure the effective exclusion of civilians in accordance with Article 5 and;
- iii. destroy or ensure the destruction of all anti-personnel mines in these mined areas as a matter of urgent priority, making its need for assistance known to other States Parties, as appropriate.

13. While Albania is proud in accomplishments, having become a State Party to the Convention that has now completed implementation of its obligation under Article 5.1, the broader effort to address the problems caused by excessive stockpiles of old ammunition in Albania continues and it requires immediate attention.

Annex I: Mined areas released as free of mines and unexploded ordnance in the contaminated areas of Northeast Albania
